Monthly LIC update – top picks

- The following report contains a LIC sector update and performance review of our coverage list for the month of April 2016.
- **Top picks:** Our top picks refer to preferred exposures within each sector based on numerous quantitative and qualitative factors. However, they should not be treated as official stock recommendations but merely as a guide to where we would apportion funds at this particular point in time.
- **Large capitalisation:** Having traded at significant premiums to NTAs for a majority of FY16 to date, a number of large cap LICs have reverted back to more normalised trading levels, offering attractive entry points. In our December 2015 quarterly update we provided data on the estimated daily premium/discount trading level of traditional large cap LICs in FY16 to date. The updated estimates on page three illustrate this reversion in trading level and show that the catalyst has been primarily driven by an increase in underlying NTAs which have moved broadly in-line with the market. Traditional large cap LICs such as Australian Foundation Investment Company (AFI), Argo Investments (ARG), BKI Investments (BKI) and Milton Corporation (MLT) are now trading at estimated discounts to NTA and provide attractive entry point for investors. AFI, trading at an estimated 0.8% discount to NTA is currently a top pick. Diversified United Investment (DUI) remains a value proposition, trading at an estimated 7.7% discount to NTA and a 5.4% discount to its peers.
- **Mid-capitalisation:** Investor sentiment for mid-cap focused LICs is clearly positive; this is evidenced by a recent announcement from Wilson Asset Management (WAM) stating the current WAM Leaders IPO has been upscaled to \$407 million to accommodate investor demand. In FY16YTD, the S&P/ASX Midcap Accumulation Index (XMDAI) has outperformed the ASX Top 20 by 21.6%. Outperformance and exposure to an underlying portfolio that may potentially complement an existing 'Blue chip' investor portfolio leaves us positively predisposed to this space. Trading at an estimated 10.3% discount to NTA, Perpetual Equity Investment (PIC) is a current top pick.
- **Small capitalisation:** April saw some notable NTA performance growth within the small cap space with LICs such as 8IP Emerging Companies (8EC) and Acorn Capital Investment Fund (ACQ), both with outperformance attributions from Lithium exposure, up 10.8% and 4.0% respectively. In May, ACQ's top holding, Redbubble (RBL) listed on the ASX. This is ACQ's fifth unlisted holding to reach a liquidity event, with an average weighted return on capital of 68.0% from the prior four holdings. ACQ is currently trading at an estimated 15.7% discount to NTA and remains a top pick. Trading at an estimated 18.1% discount to NTA and offering investors a 6.8% dividend yield partially franked, CTN is a top value pick within the small/microcap space.
- **International:** Global Value Fund (GVF) remains a top international pick given; 1) its diversified asset allocation (32.0% fixed income); 2) 5.0% dividend yield fully franked; and 3) the recent cash injection from exercised options has resulted in 19.0% of the portfolio held in cash and to be deployed. Elsewhere within the space PM Capital Global Opportunities Fund (PGF) remains a top value pick, currently trading at an estimated 14.4% discount to NTA.
- **Specialty:** Bailador Technology Investments (BTI) and Bluesky Alternative Access Fund (BAF) have both performed strongly since 31 March 2016 up 16.4% and 9.9% respectively. Although trading in-line with respective NTAs, BTI and BAF remain top picks as we look favourably upon the underlying portfolios. In particular, BTI with its largest holding Siteminder (26.9%), recently announcing a new partnership to offer a wholly-integrated online distribution solution for hotels with HiRum software solutions. HiRum is an Australian property management software provider, installed in more than 1,200 accommodation properties.

Large Cap Reversion

- Trading level reversion:** Four of the traditional large cap LICs in AFI, ARG, BKI and MLT have all experienced a reversion back to more normalised trading levels in April and May (month to date). January and February 2016 saw these LICs, on average, trade at an estimated premium to NTA of 7.8% and 8.3% respectively. As at 19 May 2016, large cap LICs have reverted back to more normalised levels and a number of large cap LICs now trading at an estimated discount to NTA, providing an attractive entry point.
- NTA v Share Price:** The figures below depict the causation of this reversion. LIC share prices since 1 March 2016 have lagged NTA growth with total shareholder return (TSR) for AFI and ARG 2.9% and -1.6% respectively. MLT and BKI share prices over the same period have increased 3.1% and 0.3%, this compares to the broader market movement (XAOAI) of 10.8%. The performance of the XAOAI is broadly represented in the underlying LIC NTA, which on average, has increased by 10.0% over the same period.
