MARKET OUTLOOK

The Australian share market experienced its first down month in nine during October, falling 1.9 per cent. This decline was not unexpected given the market had risen a hefty 58 per cent from its lows on March 6, 2009. During its staggering rise the market has failed to have a correction of more than 8 per cent, reflecting improving economic conditions and the significant amount of money sitting in cash, waiting for an opportunity to invest. We believe the market will continue to track higher through the course of 2009 and possibly into 2010. However, the medium to longer term outlook is not so easy to predict. Official interest rates are on the rise and valuations, while not expensive, are no longer historically cheap. As will be discussed at length at our Annual General Meeting and subsequent presentations, share markets following a

crash, like we experienced in 2008, do not automatically enter a multi-year bull market. To reach all time record highs is most likely to happen over five to seven years.

DIVIDENDS

On 20 July 2009 WAM Active Limited paid a final fully franked dividend of 2.0 cents per ordinary share. The DRP price was \$0.82.

The board is committed to paying an increasing stream of fully franked dividends to shareholders over time. Dividends can only be paid if the Company has sufficient profits and franking credits.
