## FY2017 full year results

On 30 August 2017, Century Australia reported an operating profit after tax of \$3.6 million for the full year to 30 June 2017. Total comprehensive income for the period increased by 542.6% to \$8.8 million, reflecting the sound portfolio performance over the period.

The investment portfolio increased 14.8% in FY2017, outperforming the S&P/ASX 300 Accumulation Index by 1.0%.

## Market overview

The S&P/ASX 300 Accumulation Index finished 0.8% higher for the month on the back of a mixed reporting season that saw many companies fall short of the market's elevated expectations. Despite this trend, earnings growth was the best in many years.

The best performing sectors during August included energy (+5.2%), consumer staples (+5.2%) and industrials (+4.6%). The largest detractor to the index was the telecommunications sector (-7.2%), following Telstra's (ASX: TLS) significant reduction in its dividend guidance for the year ahead. Financials were another poor performer (-2.1%), following a number of downgrades from insurance companies and allegations of money laundering against Commonwealth Bank (ASX: CBA) further weighing on the sector.

## Portfolio update

In August, the investment portfolio increased by 0.4%. Our equity exposure increased from 87.7% to 97.8% over the course of the month as we capitalised on opportunities identified during reporting season. A number of new positions were added to the portfolio including Tabcorp Holdings (ASX: TAH), Fairfax Media (ASX: FXJ) and QBE Insurance Group (ASX: QBE). Companies with exposure to the energy and materials sectors performed well and we increased our existing weightings in Origin Energy (ASX: ORG), Santos (ASX: STO) and BHP Billiton (ASX: BHP). BHP delivered a strong result and announced its decision to realise the value of its on-shore oil assets. Positive results from existing positions in the investment portfolio included Rio Tinto (ASX: RIO), Worley Parsons (ASX: WOR) and Orora (ASX: ORA).

## Net Tangible Assets (NTA) figures

NTA before tax	94.2c
Deferred tax asset on carry forward realised losses	6.6c*
Deferred tax asset/(liability) on unrealised income and gains/losses	(0.3)c
NTA after tax	100.5c*

\*This includes the \$10 million (1.1 cents per share) in deferred tax assets written back as part of the 30 June 2017 audited Annual Financial Report.

In addition to the deferred tax assets of 6.6 cents per share recorded in the accounts there is a further \$1.9 million or 2.1 cents per share of tax benefit on realised losses that is not carried on the company's balance sheet and is available to be offset against future taxation liabilities.

The fact that Century Australia is currently not liable to pay tax means that the level of franked dividends paid is reliant on the level of franking credits received by way of fully franked dividend income. Once the total carry forward losses are utilised, Century Australia will return to paying tax on any realised gains. Tax payments will generate additional franking credits from which franked dividends can be paid.

## Diversified portfolio
