#### WGB 66.7% increase in FY21 Interim Div Guidance

The **WAM Global Limited (WGB)** Board of Directors have announced the intention to pay a FY21 fully franked interim dividend of 5 cents per share, representing a 66.7% increase on pcp. Using the last closing price of \$2.40, WGB is trading on a forward net yield of 3.8% (5.4% grossed up). Based on the current number of shares outstanding, an annual fully franked dividend of 9 cents would utilise ~\$19.1m of profit reserves and ~\$8.2m of franking reserves. WGB reported profit reserves of \$42.5m (2019: \$17.5m) and a franking account balance of \$3.6m (2019: \$3.8m) in respect to 30 June 2020, adjusted for dividends declared but not recognised as a liability at financial year end. Recent risk-adjusted performance on the investment portfolio and current financial position were underscored as considerations for the positive guidance.

Highlighting the critical role played by banks and insurers in supporting the broader Australian economy, particularly within the context of disruptions caused by COVID-19, the Australian Prudential Regulation Authority (APRA) reinforced the need for capital buffers back in April. In its statement the regulator advised Authorised Deposit-Taking Institutions (ADIs) to "seriously consider deferring decisions on the appropriate level of dividends until the outlook is clearer". Alternatively "where a Board is confident that they are able to approve a dividend before this, on the basis of robust stress testing results that have been discussed with APRA, this should nevertheless be at a materially reduced level". Guidance was updated later in July with APRA recommending institutions retain at least half of corporate earnings before seeking to make a capital distribution decision. With financials accounting for ~28% of the S&P/ASX 200 for November, conservative and prudent dividend policies have reduced the consistency of income for many passive investors and direct holders. In this capacity LICs remain a compelling choice for investors. In comparison to a trust structure, LICs have an advantage in being able retain earnings through periods to build up a dividend reserve. This assists in maintaining a smooth and sustainable dividend over the long term that is often fully franked. We have complied a list of these superior performing companies under coverage in Figure 2.

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

#### **BELL POTTER**

Bell Potter's Indicative NTA tracks the 'indicative' movement of a LICs underlying NTA each month by monitoring the percentage movements of the disclosed holdings, and using an index to track the movement of the remaining positions. We have also included an adjusted indicative NTA and adjusted discount, which removes the LIC distribution from the ex-dividend date until the receipt of the new NTA post the payment date.

<sup>\*</sup>LTM Dividend is the total dividends paid over the last 12 months, excluding Special Dividends paid. #Franking assumes a tax rate of 30%, actual company take rate applied may differ.

## **BELL POTTER**

We have enclosed a reference page for dividends. We have used historical dividend data for the dividend information, and manager guidance where appropriate. Please note that historical dividends are no guarantee of future dividends to be paid.

#### **BELL POTTER**

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.

#### **BELL POTTER**

The effective impact on the share price if the premium or discount were to normalise to the historical averages. The Bell Potter's Indicative NTA is not without error, and to be used as a guide only. As such we have included the average error (average monthly NTA less indicative NTA), average absolute error (average monthly NTA less indicative NTA on an absolute basis), and the range of minimum and maximum errors.
