MARKET OUTLOOK

The sharemarket's downward movement in October was short-lived, with equity prices rising strongly in the first half of November. After almost 3 years, volatility has returned to the market as investors become more cautious. We remain cautious, but continue to seek out companies that are growing strongly, and that are priced reasonably.

DIVIDEND

The final dividend of 6.0 cents a share fully franked, brought the full year dividend to 12.0 cents a share. The shares traded ex dividend from 4 October 2005, with payment on 17 October 2005.

PORTFOLIO STRUCTURE & STRATEGY

As at 31 October 2005, equities made up approximately 74% of the portfolio, while fixed interest, and cash made up the remaining 26%. We continue to focus on companies with strong earnings per share growth, trading on attractive earnings multiples, that are well positioned in growth industries and have proven management. We continue to research heavily to find companies that meet this profile.
