WAM Global Limited (WGB) ACN 624 572 925

Dear Shareholder,

The WAM Global Limited Board of Directors is pleased to present a one-for-one Bonus Issue of Options to all shareholders of the Company, at no additional cost.

Each WAM Global Option provides holders with the right, but not the requirement, to purchase one additional WAM Global share for \$2.54 per Option, without paying brokerage fees. The options can be exercised anytime, up until 12 September 2022. Shares issued on options exercised on or before 26 May 2021 will receive the fully franked interim dividend of 5.0 cents per share, which represents an annualised fully franked dividend yield of 3.9% and a grossed-up dividend yield of 5.6%[†] on the exercise price of \$2.54 per Option.

Approaching the third anniversary of WAM Global's listing on the ASX, I am pleased that we have delivered shareholders diversified global equity exposure, solid investment portfolio performance and increased fully franked dividends, while closing the share price discount to net tangible assets. I am excited by the opportunity to significantly grow the Company's assets to the benefit of all shareholders.

The investment portfolio currently holds 4.4%, as at 9 February 2021, in cash and the investment team sees significant opportunities that fit the WAM Global investment process. Lead Portfolio Manager Catriona Burns and the team discussed their positive outlook and a selection of undervalued global growth companies during the [WAM Global Interim Results Webinar](#) on 4 February 2021.

Advantages of increasing the Company's capital base

The Board believes that the Issue is an equitable and effective way to grow the Company's assets. As the Company's size increases, on-market liquidity for the Shares is also expected to increase, making it easier for Shareholders to buy and sell the Company's Shares. By increasing the size of the Company, this will increase the Company's relevance in the market, improve the prospect of broker and research coverage, increase interest from financial planners and gain additional access to market opportunities. Finally, the increased size is also expected to reduce the fixed expense ratio of the Company for shareholders.

Advantages of the Issue for Shareholders

- The Options will trade on the ASX and may trade above or below their intrinsic value;
- Shareholders can sell their Options on-market or buy additional Options; and
- By exercising Options, shareholders can increase their holding in the Company without incurring any brokerage fees, and at a fixed price that is below the current market price.

Dividends

On 29 January 2021, the Board announced a fully franked interim dividend of 5.0 cents per share. The interim dividend represents an annualised fully franked dividend yield of 3.9% and a grossed-up dividend yield of 5.6%, based on the exercise price of \$2.54 per Option. Shares issued on options exercised on or before 26 May 2021 will receive the fully franked interim dividend of 5.0 cents per share. The fully franked interim dividend will be paid on 7 June 2021 and the shares will trade ex dividend on 31 May 2021.

The Company's profits reserve is currently 43.0 cents per share, representing 4.3 years dividend coverage, and forms part of the NTA of the Company. The Company aims to pay dividends on a six-monthly basis, provided the Company has sufficient profits reserve and franking credits, and it is within prudent business practices. This is an investment objective of the Company rather than a forecast. The Company may not be successful in meeting this objective.

Use of the additional capital

No capital will be raised from the issue of the Options. If 212,714,212 Options are issued and those Options are fully exercised, the Company will raise approximately \$540.3 million.

The proceeds of the additional capital raised from the exercise of Options will be invested in accordance with the Company's proven and disciplined investment process. The investment objectives are to deliver investors a stream of fully franked dividends, provide capital growth over the medium-to-long term and preserve capital.

If the Investment Manager does not identify an opportunity using its investment approach, it will revert to cash. The average cash holding since inception of the Company is 16.2%.

The Investment Manager's principal activity is to make investments in international listed equities. The Company aims to maximise shareholder returns by identifying undervalued international growth companies, in order to deliver a combination of capital growth and income. The Investment Manager scours the market for opportunities to undertake investments on a portfolio basis. To implement the strategy, the Investment Manager will employ Wilson Asset Management's proven investment process of research driven and market driven investing. The research-driven investment process involves diligent and deep research that focuses on cash flow, return on equity and the quality of a company. The market-driven investment process takes advantage of short-term mispricing opportunities in the global equity market. The investment portfolio is managed actively and during the 2020 financial year, the equity component of the portfolio turned over 1.9 times. See Section 7.1 to 7.2 for further details.

Prospectus and the Issue

The Board recommends you read this Prospectus carefully and in its entirety before making a decision to deal in Shares and Options. If you have any questions about the Prospectus, please contact your professional adviser. This Prospectus provides details of the Issue and an overview of the business and activities of the Company. Each Option entitles shareholders the opportunity, but not the obligation, to subscribe for one additional Share at the exercise price of \$2.54 per Option at any time on or before 5:00pm (Sydney time) on 12 September 2022.

The Board is focused on growing the Company and creating shareholder value and believes the Bonus Option Issue will promote growth of the Company's assets by providing further opportunity for the investment team to identify and invest in undervalued global growth companies and increase its relevance in the market. A Bonus Option Issue delivers further benefit to shareholders as the owners of the Company by increasing their claim to any future income and capital growth without incurring any brokerage fees.

On behalf of the Board of Directors, I thank you for your continued support.

Yours sincerely

Geoff Wilson AO
Chairman
WAM Global Limited

3. Risk factors

3.1 Risk factors

Intending investors should be aware that dealing in and exercising Options involves various risks. There are general risks associated with owning Securities in publicly listed companies. The price of Securities can go down as well as up due to factors outside the control of the Company. Some of these factors include global economic and political stability, natural disasters, performance of the domestic and global share markets, interest rates, foreign exchange, taxation and labour relations environments.

The operating results and profitability of the Company are sensitive to a number of factors. The following matters, as well as others described elsewhere in this Prospectus, should be carefully considered in evaluating the Company and its prospects:

- (a) The success and profitability of the Company in part depends upon the ability of the Investment Manager to identify market mispricing and trading opportunities and to invest in well-managed companies which have the ability to increase in value over time. Even if the Company does not perform well, it may be difficult to remove the Investment Manager;
- (b) The future earnings of the Company and the value of the investments of the Company may be affected by the general economic climate, commodity prices, currency movements, changing government policy and other factors beyond the control of the Company. As a result, no guarantee can be given in respect of the future earnings of the Company or the earnings and capital appreciation of the Company's investments;
- (c) Variations in legislation and government policies could materially affect operating results;
- (d) All investments carry the risk that their value may be affected by changes in laws and regulations, especially taxation laws. Regulatory risk includes risk associated with variations in the taxation laws of Australia or other jurisdictions in which the Company holds investments. Any variation in the taxation laws of Australia could materially affect the operating results;
- (e) Any variation in foreign exchange rates could materially affect the operating results. Foreign exchange contracts, derivatives, natural hedging or other methods may be used to hedge against the movements of foreign currencies relative to the Australian dollar. However, the Company may not be fully hedged to Australian dollars and it is likely that the Company will have a currency exposure as a result of the Company's investment in global securities.

Investing in assets denominated in a foreign currency creates an exposure to foreign currency fluctuations, which can change the value of the Portfolio's investments measured in Australian dollars. The Company's Investment Strategy seeks to assess the potential returns and risks created by currency exposures and to position the Portfolio with the aim of capturing those returns while minimising those risks. The Investment Manager may seek to manage the Portfolio's currency exposure using derivatives and cash foreign exchange trades. As part of its investment process, the Investment Manager will also assess the indirect impact of currency on the companies it invests in and the potential for exchange rate movements to amplify or diminish Australian dollar returns for a holding;
- (f) Any variation in short and long term interest rates could materially affect the operating results through their effect on the price of a security and the cost of borrowing;
- (g) Any variation in commodity prices could materially affect the operating results;
- (h) There is a risk that Shares will fall in value over short or extended periods of time. Historically, shares have outperformed other traditional asset classes over the long term. Share markets tend to move in cycles, and individual share prices may fluctuate and underperform other asset classes over extended periods of times. Shareholders in the Company are exposed to this risk both through their holding in Shares and Options in the Company as well as through the Company's Portfolio;
- (i) The past performance of the Company and other entities managed by the Investment Manager, and persons associated with the Investment Manager, are not necessarily a guide to future performance of the Company. The success and profitability of the Company will largely depend on the Investment Manager's continued ability to manage the Portfolio in a manner that complies with the Company's objectives, strategies, policies, guidelines and permitted investments. A failure to do so may negatively impact the Company and its Securities. In addition, there are risks inherent in the investment strategy that the Investment Manager will employ for the Company;
- (j) Short selling securities involves borrowing stock and selling these borrowed securities. Short Selling is subject to the theoretically unlimited risk of loss because there is no limit on how much the price of a security may appreciate;

Additionally, there is a risk that the Securities lender may request return of the Securities. These risks may give rise to the possibility that positions may have to be liquidated at a loss and not at a time of the Investment Manager's choosing.

- (k) The selling or purchasing of an unhedged option or warrant runs the risk of losing the entire investment or of causing significant losses to the Company in a relatively short period of time;
- (l) The Investment Manager may receive compensation based on the Company's performance. This performance fee may create an incentive for the Investment Manager to make investments that are riskier or more speculative than would otherwise be the case;
- (m) The Company's Portfolio may be less diversified than other listed investment companies;
- (n) Shareholders are reminded that any investment in the Company should be regarded as a long term proposition and to be aware that, as with any equity investment, substantial fluctuations in the value of their investment may occur; and
- (o) The ability of the Investment Manager to continue to manage the Company's Portfolio in accordance with this Prospectus and the Corporations Act is dependent on the maintenance of the Investment Manager's AFSL and its continued solvency. Maintenance of the AFSL depends, among other things, on the Investment Manager continuing to comply with the ASIC imposed licence conditions and the Corporations Act.

4. Terms of the Issue

4.1 The Issue

The Issue is a one-for-one Bonus Issue of Options, each Option being exercisable into one additional WAM Global Share at an exercise price of \$2.54 per Option.

No funds will be raised by the grant of the Options. If the maximum number of Options are issued under this Prospectus and are subsequently exercised, the Options issued would raise approximately \$540,294,098.

The Issue is made to all Shareholders registered at 5:00pm (Sydney time) on the Record Date being, 11 March 2021.

The maximum number of Options which may be issued is approximately 212,714,212. The number of Options which you have been issued is shown on the Option Exercise Form. You do not need to take any action to receive the Options.

If you would like to exercise your Options you can do so by returning a completed Option Exercise Form to the share registrar or the Company and paying \$2.54 per Option to the Company by BPAY or cheque.

4.2 Rights attaching to Options

On exercise, the Options will be converted to fully paid ordinary Shares in the Company. Detailed provisions relating to the rights attaching to Options and Shares are set out in the Company's Constitution and the Corporations Act. A copy of the Constitution can be inspected during office hours at the registered office of the Company.

See Section 9.3 for a summary of the rights attaching to the Options and Section 9.4 for the rights attaching to the Shares.

4.3 ASX quotation of the Options

Within 7 days after the date of this Prospectus, application will be made to the ASX for the Options to be quoted on the ASX.

If the ASX does not give permission for quotation of the Options within 3 months after the date of this Prospectus (or a later date permitted by ASIC), none of the Options will be issued and if any have been issued, the issue will be void, unless ASIC grants an exemption permitting the Issue.

It is expected that quotation of the Options will initially be on a deferred settlement basis.

4.4 Issue and allotment of Options

No Options or other securities will be issued on the basis of this Prospectus later than the expiry date of this Prospectus being the date 13 months after the date of this Prospectus.

It is expected Options will be issued on 12 March 2021. It is anticipated that Option Exercise Forms in relation to the Options will be despatched on 15 March 2021.

It is the responsibility of Shareholders to determine their allocation prior to trading in Options. Shareholders who sell any Options before they receive their Option Exercise Form will do so at their own risk.

4.5 Overseas Shareholders

The Options are not offered in any jurisdiction in which, or to any person to whom, it would be unlawful to make such an offer.

The Company may form the view that it is unreasonable to make the Issue to overseas Shareholders in jurisdictions (Excluded Holders) having regard to:

- (a) the number of Excluded Holders within the relevant jurisdiction;
- (b) the number and value of Shares held by those Excluded Holders; and
- (c) the cost of complying with overseas legal requirements within the relevant jurisdiction.

The Issue is not being extended, and does not qualify for distribution or sale, and the Options may not be issued to a Shareholder with a registered address outside Australia and any other jurisdiction in which it is not lawful to make the offers of Options in accordance with this Prospectus.

Where the Prospectus has been despatched to persons domiciled in a country other than Australia, and where that country's securities code or legislation prohibits or restricts in any way the making of the Issue, the Prospectus is provided for information purposes only.

4.6 Taxation

The potential tax effects relating to the Issue will vary between Shareholders. Shareholders are urged to consider the possible tax consequences of exercising Options by consulting a professional tax adviser.

The Directors do not consider that it is appropriate to give Shareholders advice regarding the taxation consequences of being granted Options under this Prospectus as it is not possible to provide a comprehensive summary of the possible taxation positions of all Shareholders.

The Company, its advisers and officers, do not accept any responsibility or liability for any taxation consequences to Shareholders in respect of the Issue. Shareholders should consult their own professional tax adviser in connection with the taxation implications of the Issue.

Before deciding to exercise your Options, you should consider whether the Shares to be issued and allotted on exercise of the Options are a suitable investment for you. There are general risks associated with any investment in the stock market. The value of Shares listed on the ASX may rise or fall depending on a range of factors beyond the control of the Company.

If you are in doubt as to the course you should follow, you should seek advice on the matters contained in this Prospectus from a stockbroker, financial adviser, accountant, lawyer or other professional adviser immediately.

The Company's profits reserve is currently 43.0 cents per share, representing 4.3 years dividend coverage, and forms part of the net tangible assets (NTA) of the Company. The increase in the fully franked interim dividend is consistent with the Company's investment objective of delivering investors a stream of fully franked dividends.

^{*}The HY2021 profit figures are unaudited. Audited half-year results will be announced to the market in February 2021.

^{*}Investment portfolio performance and Index performance are before expenses, fees and taxes.

Performance as at 31 December 2020	Fin YTD	1 Yr	Since inception %pa (Jun-18)
WGB Investment Portfolio	15.5%	9.3%	9.9%
MSCI World Index (AUD)	9.7%	5.6%	9.8%

The performance table for the relevant periods has been calculated on the basis of the following assumptions:

2. The above table is not intended to be an indication of future performance of any asset class, index or the Portfolio.
3. The Company's performance for each of the periods set out above reflect the annualised percentage changes in the value of the Company's Portfolio. The Company's performance has been calculated:
 - (a) by reference to the last sale price on the respective securities exchange for each investment on the last trading day of each month and the amount of cash maintained by the Company as at that date;
 - (b) on a monthly basis, compounded and then annualised over the relevant period;
 - (c) by including on an accruals basis of dividends, interest and other distributions;
 - (d) before the payment of all expenses and fees;
 - (e) without taking into account any value derived through imputation credits;
 - (f) before income tax expenses. The Company considers that the presentation of performance before income tax expense allows the Company's performance to be compared to the MSCI World Index (AUD) and MSCI World SMID (Small/Mid) Cap Index in AUD terms;
4. The Company's performance has been presented as a percentage in order to compare it with MSCI World Index (AUD) and MSCI World SMID (Small/Mid) Cap Index in AUD terms.

7. Overview of the Company

7.1 Investment objectives

The Company's investment objectives are to deliver investors a stream of fully franked dividends, provide capital growth over the medium-to-long term and preserve capital.

The Company's ability to pay fully franked dividends is subject to the Company having sufficient profits reserve and franking credits available and it is within prudent business practices to do so.

The above is not intended to be a forecast, it is merely an investment objective of the Company. The Company may not be successful in meeting this objective.

7.2 Investment process

WAM Global provides investors with access to the Investment Manager's two distinctive investment processes: a research-driven process focused on identifying undervalued companies and a market-driven process that takes advantage of mispricing opportunities. The research-driven process involves diligent and deep research that focuses on free cash flow, return on equity and the quality of a company. Each company is carefully rated with respect to management, earnings growth potential, valuation and industry position. Under this process, our investment team will only ever invest in a security once we can identify a catalyst or event that we expect will change the market's valuation of the company. The market-driven process takes advantage of short-term mispricing opportunities in the global equity market, rather than investing in any individual companies or a portfolio of companies for a prolonged period of time. Opportunities are derived from initial public offerings, placements, block trades, rights issues, corporate transactions (such as takeovers, mergers, schemes of arrangement, corporate spinoffs and restructures), arbitrage opportunities, LIC discount arbitrages, short-selling and trading market themes and trends.

The Company's investment process is further detailed in Section 3 of the original Prospectus dated 20 April 2018, available on the Company's website (www.wilsonassetmanagement.com.au).

7.3 Permitted investments

The Investment Manager may invest in:

- international and Australian Securities;
- derivatives including futures, forwards, warrants and contracts;
- bills of exchange, negotiable investments and debentures; and
- cash.

7.4 Dividend policy

The Board is committed to paying a stream of fully franked dividends to shareholders, provided the Company has sufficient profits reserve and franking credits, and it is within prudent business practices. In January, the Board of Directors declared a fully franked interim dividend of 5.0 cents per share, which represents a 66.7% increase on the FY2020 fully franked interim dividend. The

Company's profits reserve as at 31 December 2020 is 43.0 cents per share, representing 4.3 years dividend coverage, and forms part of the net tangible assets (NTA) of the Company. Since inception in June 2018, WAM Global has paid 9.0 cents per share in fully franked dividends to shareholders. The Company's ability to generate franking credits is dependent primarily upon the payment of tax on profits, as well as the receipt of franked dividends. This is not intended to be a forecast, it is merely an objective of the Company. The Company may not be successful in meeting this objective in the future.

ASX Listing

The Company must make application for quotation of Shares issued on exercise of the Options on the ASX in accordance with the Listing Rules. Shares so issued will rank equally with other issued Shares of the Company.

9.4 Rights attaching to the Shares

The following information is a summary of the terms of issue of Shares as contained in the Company's Constitution. Shareholders have the right to acquire a copy of the Company Constitution, free of charge, from the Company until the expiry of this Prospectus.

Each Share confers on its holder:

- the right to vote at a general meeting of Shareholders (whether present in person or by any representative, proxy or attorney) on a show of hands (one vote per shareholder) and on a poll (one vote per Share on which there is no money due and payable) subject to the rights and restrictions on voting which may attach to or be imposed on Shares (at present there are none);
- the right to receive dividends, according to the amount paid up on the Share;
- the right to receive, in kind, the whole or any part of the Company's property in a winding up, subject to priority given to holders of Shares that have not been classified by ASX as "restricted securities" and the rights of a liquidator to distribute surplus assets of the Company with the consent of members by special resolution; and
- subject to the Corporations Act and the Listing Rules, Shares are fully transferable.

The rights attaching to Shares may be varied with the approval of Shareholders at a general meeting by special resolution.

There are general risks associated with any investment in the stock market. The value of shares listed on the ASX may rise or fall depending on a range of factors beyond the control of the Company.

If you are in doubt as to the course you should follow, you should seek advice on the matters contained in this Prospectus from a stockbroker, accountant, solicitor or other professional adviser immediately.

The potential tax effects relating to the Issue will vary between Shareholders. Shareholders are urged to consider the possible tax consequences of participating in the Issue by consulting a professional tax adviser.
