2. INFORMATION ON WILSON INVESTMENT FUND LIMITED

2.1 Overview of Business

Wilson Investment Fund Limited is a company which has been formed to invest in a portfolio of permitted investments (see Section 2.9 for details). The Company provides investors with the opportunity to invest in a medium to long term Portfolio and gain access to a defined investment process and the management experience of the management team of the Manager.

The Company will predominantly invest in ASX listed Securities. It is anticipated that the majority of the monies raised will be invested in Australian equities. The Company will take a medium to long term view with respect to its investments.

The Company will focus on active capital management which will involve buy-backs of its Shares when its Shares are trading at a sizeable discount to its net tangible asset backing and the issue of other securities through bonus issues, rights issues and option issues, with a view to enhancing the value of the Securities held by the investor. The Company will also maintain a dividend reinvestment plan. See Section 10.8 for details.

The Company intends to manage its Portfolio with a view to building the number of entities represented in the Portfolio to a minimum of 30 stocks.

2.2 Investment Objectives

The 3 investment objectives of the Company are to:

- achieve a high real rate of return, comprising both income and capital growth, within risk parameters acceptable to the Directors;
- deliver investors a secure income stream in the form of fully franked dividends; and
- preserve the capital of the Company.

2.3 Investment Philosophy and Focus

Investment Philosophy

The investment philosophy of the Company is exemplified by the following broad principles:

- The Company's philosophy is to buy and hold shares for medium to long term investment purposes.
- The universe of potential investments for the Company will be all Securities quoted on the ASX or other exchanges, bills of exchange, other negotiable investments, debentures and other permitted investments identified in Section 2.9 below. The prime focus will be on listed entities that exhibit the investment characteristics outlined below. The Company believes a number of these entities will be found in medium sized industrial companies but size will not be a limiting factor for inclusion in the Company's Portfolio.
- The Company's philosophy is to invest predominantly in industrial companies with an emphasis on companies that are under-researched and mispriced.
- The Company's preference is to invest in industrial companies that have a proven track record of profit and dividends.
- The Company will undertake investments on a portfolio basis. While all investments will be considered on a case-by-case basis, the Company will usually refrain from taking a majority position in investee entities unless the opportunity is compelling. This will assist the Company to diversify its investments and so reduce its exposure to abnormal falls in the market price of any single investment.
- The Company believes it will achieve acceptable diversification by owning Securities in 30-50 investee entities.
- The Company will seek to manage investment risk by spreading investments over a range of industry sectors.
- The Company may invest in Securities quoted on a securities exchange located outside Australia if the Board considers that the reporting obligations and trading procedures applicable to that exchange are no less rigorous than those of ASX.
- The Company will look to concentrate on absolute returns and preservation of capital.

The Directors consider that the investment philosophy outlined above is shared by the Manager.

Investment Focus

The typical investment approach of the Company will be to seek a combination of value and growth. An entity which is attractively priced relative to its appraised value, that exhibits growth characteristics, generates surplus cashflow, has a history of delivering

dividend growth, is well managed and has a sound position in its industry is an ideal investment for the Company.

Shares will be purchased based on either a research driven process or an investment driven process.

For research driven investments, once the research and relative ranking has been undertaken, the Manager will seek to identify a catalyst or a major event that alters the market's perception of the entity or its earnings momentum which will lead to a re-rating of the investee company's share price.

For the investment driven process, once the research and the identification of the required characteristics has been undertaken, the Manager will decide on the appropriate time for the shares to be purchased.

The Company will have a major bias to industrial companies. It will not invest a significant part of the Portfolio in the resource sector. The Directors consider that resource companies are subject to extreme volatility and are difficult to value according to conservative accounting and investment principles.

2.4 Investment Strategy

The principal factors in determining the investment decisions of the Company are extensive. This may involve detailed discussion with management of the investee entity and its competitors.

Initially the Manager will identify a universe of stocks for investment by the Company. This involves considering relevant micro and macro economic factors and targeting under-researched companies.

Once a potential investment has been identified, the Manager will undertake extensive analysis. Publicly available information about the entity will be accessed and discussion with competitors undertaken where possible. The Manager will then meet with the potential investee company's management, discussing at length the various dynamics of the business, focusing on profit drivers.

The above strategy may be achieved through the purchase of shares or other permitted investments. See Section 2.9 for details.

2.5 Research Driven Process

This process requires each potential investment to be rated with respect to:

- (a) management;
- (b) projected earnings per share growth;
- (c) valuation - utilising a price for growth formula;
- (d) the industry and the investee's position in that industry; and
- (e) the generation of free cashflow.

The above rating system works as a filter identifying the most appropriate investments.

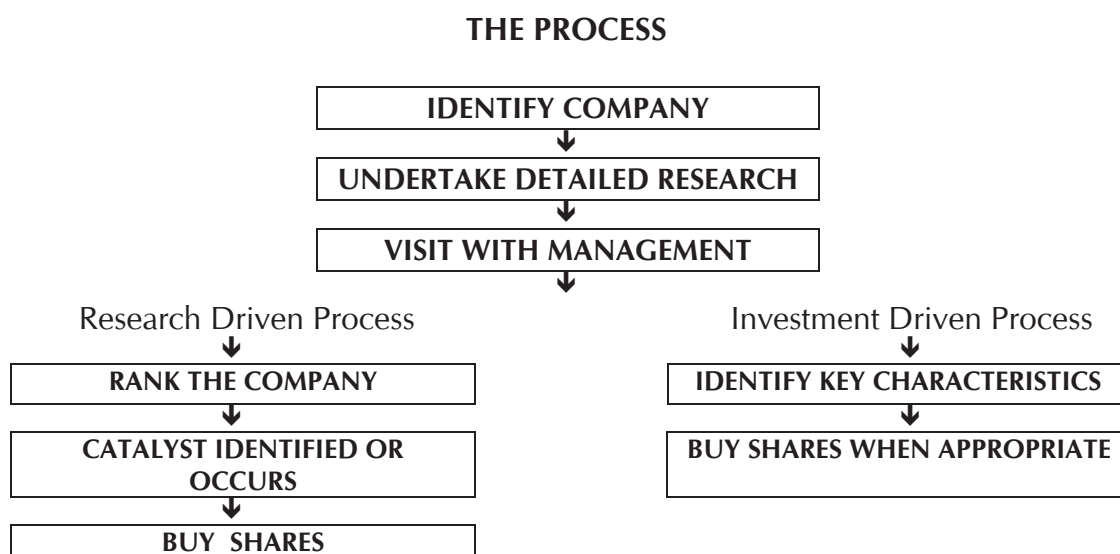

Before undertaking a research-driven investment, the Manager will identify a catalyst or event that it believes will lead to an increase in the market value of the investment.

2.6 Investment Driven Process

This process requires that each of the characteristics listed below are identified in the investee companies:

- (a) sustainable business model;
- (b) track record of dividends;
- (c) track record of profits and positive free cashflow;
- (d) acceptable financial strength; and
- (e) return on equity.

Once all of the above characteristics have been identified in a company, the timing of its purchase will require patience and a medium to long term investment horizon. Valuation will be a key element of any purchase.

2.7 Dividend Policy

The Company will pay dividends from the profit, dividend and interest income it receives from its investments to the extent permitted by law and prudent business practices. Dividends will be franked to the extent that available imputation credits permit. Dividends that are paid from the realisation of a capital gain will be passed on to shareholders.

2.8 Capital Structure Policy

The Board will regularly review the capital structure of the Company and, where the Board considers appropriate, undertake on market buy-backs of its Shares.

2.9 Permitted Investments

Permitted Investments and Strategy

Under the Management Agreement, the Manager is permitted to undertake investments on behalf of the Company without Board approval. However, if the proposed investment is not in accordance with written guidelines issued by the Board from time to time, Board approval for the investment is required.

The Company proposes to invest in the following investments:

- (a) listed Securities, being any Security quoted on ASX and other markets including, without limitation, shares, units or notes which are redeemable, preference or deferred, fully or partly paid, with or without any right, title or interest thereto or therein (including a right to subscribe for or convert to any such Security whether listed on ASX or not), and any Security of whatsoever nature which the Manager expects will be quoted on ASX within a 12 month period from the date of investment;
- (b) listed Securities on any global stock market where the Security is also listed on the ASX;
- (c) warrants and options to purchase any investment and warrants and options to sell any investment which is a permitted investment;
- (d) discount or purchase of bills of exchange, promissory notes or other negotiable instruments accepted, drawn or endorsed by any bank, or by any corporation of at least an investment grade credit rating granted by a recognised credit rating agency in Australia;
- (e) debentures, unsecured notes and bonds of a corporation of at least an investment grade credit rating granted by a recognised credit rating agency in Australia;
- (f) units or other interests in cash management trusts; and
- (g) any other financial products with which the Manager may use in the management of the Portfolio in accordance with its Australian Financial Services Licence.

Under the Management Agreement, the Manager may only undertake investments in accordance with the above criteria.

2.10 Reports to Shareholders

To assist shareholders in the Company to assess the value of Shares and Options and to comply with the Listing Rules, within 14 days after the end of each month the Company will release to shareholders through ASX a statement of the net tangible asset backing of

its Shares as at the end of the preceding month. The calculation of the net tangible asset backing of Shares will be made in accordance with the Listing Rules.

The Company will provide to holders of Shares and Options on request, free of charge, a copy of statements to shareholders through ASX of the net tangible asset backing of Shares from time to time.

4.5 Proposed Accounting Policies and Notes to Accounts

A summary of significant accounting policies which have been adopted in the preparation of the pro forma Statements of Financial Positions set out in Section 4.1 or which will be adopted and applied in preparation of the financial statements of the Company for the year ended 30 June 2003 and subsequent years is set out as follows:

- (a) Basis of preparation of accounts

The financial statements are a general purpose financial report that have been prepared in accordance with applicable Accounting Standards and other mandatory professional reporting requirements (Urgent Issues Group Consensus Views) and the Corporations Act 2001. The Statements are prepared from the records of the Company on an accruals basis. They are based on historical costs and do not take into account changing money values or, except where specifically stated, current valuation of non-current assets.

- (b) Investments

Australian Stock Exchange (ASX) listed shares and securities are valued at market value as quoted on the ASX less an allowance for realisation costs. Non listed ASX shares and securities are valued at their estimated market value less an allowance for realisation costs. Investments including shares and securities are valued continuously and for this reason, cost of sales equals sales revenue when investments are sold. Revaluations are credited directly to the Asset Revaluation Reserve after deducting a provision for potential deferred capital gains tax. When shares, securities and other investments are disposed of, the balance in the Asset Revaluation Reserve relating to the disposed share, Security or other investment is transferred to the Capital Profits Reserve.

- (c) Revenue recognition

Dividends and distributions are brought to account on the date that the shares or units are traded "ex-dividend". Interest income is brought to account on an accruals basis.

4.6 Proceeds of the Issue

The proceeds of the Issue will be used for investment opportunities that meet the Company's investment objectives as set out in Section 2.

6. RISK FACTORS

6.1 General Risk Factors

The following matters, as well as others described elsewhere in this Prospectus, should be carefully considered in evaluating the Company and its prospects:

- (a) the success and profitability of the Company in part will depend upon the ability of the Directors and the Manager to invest in well-managed companies which have the ability to increase in value over time;
- (b) the future earnings of the Company and the value of the investments of the Company may be affected by the general economic climate, commodity prices, currency movements, changing government policy and other factors beyond the control of the Company. As a result, no guarantee can be given in respect of the future earnings of the Company or the earnings and capital appreciation of the Company's investments;
- (c) variations in legislation and government policies generally could materially affect operating results of the company;
- (d) any variation in the taxation laws of Australia could materially affect the operating results of the company;

- (e) any variation in the exchange rates could materially affect the operating results of the company;
- (f) any variation in short and long term interest rates could materially affect the operating results of the Company;
- (g) any variation in commodity prices could materially affect the operating results of the Company;
- (h) the price of investments that the Company has purchased can fall as well as rise;
- (i) the past performance of funds managed by the persons associated with the Manager are not necessarily a guide to future performance of the Company;
- (j) the selling or purchasing of an unhedged option or warrant runs the risk of losing the entire investment or of causing significant losses to the Company in a relatively short period of time;
- (k) the performance fee may create an incentive for the Manager to make investments on behalf of the Company that are riskier or more speculative than would be the case in the absence of a fee based on the performance of the Company;
- (l) the Portfolio is less diversified than other listed investment companies;
- (m) the price at which Shares are traded on ASX may be below the net asset backing of those Shares. The constitution of the Company does not entitle Shareholders to require the Board to implement a share buy-back or any other capital reconstruction or to take any other remedial action;
- (n) operational costs for the Company as a proportion of total assets will be affected by the level of total assets of the Company and by the level of acceptance of this Offer. Operational costs will represent a greater proportion of total assets and will reduce the operating results of the Company and accordingly the ability to make dividend payments, if the Company only achieves the minimum subscription under this Offer than if it secures a greater level of acceptance;
- (o) the size of the Portfolio will affect the risk profile of the Portfolio. The Company may not be able to diversify its investments and so manage its risks as efficiently if it achieves the minimum subscription under this Offer than if it secures a greater level of acceptance. However, the risk of loss of investments included in the Portfolio will not necessarily be reduced if the level of acceptance under this Offer exceeds the minimum subscription. Effective risk management depends on a range of factors including diversification of investments and other factors;
- (p) the ability of the Manager to continue to manage the Portfolio in accordance with this Prospectus and the Corporations Act is dependent on the maintenance of the Manager's Australian Financial Service ("AFS") licence and its continued solvency. Maintenance of the AFS licence depends, among other things, on the Manager continuing to comply with the ASIC imposed licence conditions and the Corporations Act;

- (q) the Manager has the ability to transfer the management agreement to another Manager as it sees fit, which may change the personnel responsible for managing the Portfolio of the Company; and
- (r) investors are strongly advised to regard any investment in the Company as a long term proposition and to be aware that, as with any equity investment, substantial fluctuations in the value of their investment may occur.

This list is not exhaustive and potential investors should read this Prospectus in full and, if they require further information on material risks, seek professional advice.

6.2 Investor Considerations

Before deciding to subscribe for Shares and Options, Applicants should consider whether Shares and Options are a suitable investment. There are general risks associated with any investment in the stock market. The value of Shares listed on the ASX may rise or fall depending on a range of factors beyond the control of the Company.

There may be tax implications arising from the application for Shares and Options, the receipt of dividends (both franked and unfranked) from the Company, participation in the dividend re-investment plan of the Company, participation in any on market share buy-back and on the disposal of Shares or Options. Applicants should carefully consider these tax implications and obtain advice from an accountant or other professional tax adviser in relation to the application of tax legislation.

If you are in doubt as to whether you should subscribe for Shares and Options, you should seek advice on the matters contained in this Prospectus from a stockbroker, solicitor, accountant or other professional adviser immediately.

4. Review of Financial Information

- 4.1 We have conducted our review of the pro forma Statements of Financial Position in accordance with Auditing Standards AUS902 "Review of Financial Reports" and AUS804 "The Audit of Prospective Financial Information". Our procedures consisted primarily of enquiry and comparison and such other analytical procedures we, in our professional judgement, considered necessary so as to adequately evaluate whether the assumptions and estimated expenses appear reasonable in the circumstances.

These review procedures were substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and do not provide all the evidence that would be required in an audit, thus the level of assurance provided is less than given in an audit. We have not performed an audit and accordingly do not express an audit opinion.

5. Statement on Financial Information

Based on our review, which is not an audit, nothing has come to our attention which causes us to believe that:

- a) the pro forma financial information has not been properly prepared on the basis of the pro forma transactions
- b) the pro forma transactions do not form a reasonable basis for the pro forma information

- c) the assumptions, notes, accounting policies and estimated expenses of the offer made by directors, do not provide a reasonable basis for the preparation of the pro forma statements of Financial Position

6. Working Capital

As required by ASX Listing Rule 1.3.3, we advise that in our opinion, the Company will have enough working capital to carry out its stated objectives.

7. Subsequent Events

Apart from the matters dealt with in this report, and having regard to the scope of our report, to the best of our knowledge and belief no material transactions or events outside of the ordinary business of the Company have come to our attention that would require comment on, or adjustment to, the information referred to in our report or that would cause such information to be misleading or deceptive.

Yours faithfully,

8. TAXATION REPORT

The Directors
Wilson Investment Fund Limited
Level 11

SYDNEY NSW 2000

16 June 2003

Dear Sirs

INDEPENDENT TAXATION REPORT

We have been requested to provide a report on the income tax issues affecting Wilson Investment Fund Limited (the "**Company**") and its shareholders. The report has been prepared for inclusion in a Prospectus to be dated on or about 16 June, 2003 under which investors will be invited to subscribe for a minimum of 10.5 million ordinary Shares paid to \$1.00. Attached to every share acquired will be one option with an exercise price of \$1.00. This report should be read in conjunction with the Prospectus issued.

Our advice is based on the relevant taxation laws as presently incorporated in *the Income Tax Assessment Act 1936, Income Tax Assessment Act 1997 and Income Tax Rates Act 1986* (all of which are referred to collectively herein as "the Act").

This opinion only provides a general overview of the income tax consequences to investors. It is not intended to be a detailed analysis of all such issues. Individual investors should consult their own taxation advisor about their specific taxation circumstances.

Shareholders in a public company are generally taxed on the dividends received and are subject to the Income Tax upon the disposal of their shares in the company.

(a) Dividends

Dividends received by an Australian resident shareholder (either directly or indirectly through a partnership or trust) is included in the taxable income of the shareholder.

To the extent that dividends are franked, then the imputation credits attached to the franked dividend are also included in the taxable income of the shareholder. Shareholders are then entitled to a tax credit equivalent to the imputation credit received.

Dividends received by a non-resident shareholder will be subject to 15% withholding tax, to the extent the dividend received are unfranked. No withholding tax is paid on franked dividends.

Where shareholders receive franked dividends from the Company, the shares in the Company need to be held 'at risk' (as defined) for a period of 45 days before being entitled to franking benefits.

LIC Capital Gains

Under s115-D of the Tax Act a listed investment company ("LIC") may make an "LIC Capital Gain" where it sells a post-1985 asset after 1st July 2001, where that asset has been held for more than 12 months. We have assumed that the company will meet the definition of a Listed Investment Company.

In accordance with current tax law, this gain will be taxable to the LIC at 30%.

Assuming the LIC transfers the LIC Capital Gain profit (after tax) to a Discount Capital Gains Reserve, a dividend paid from this reserve would attract concessional tax treatment in the hands of the shareholder.

The dividend paid would be frankable and subject to the regular franking rules. Certain shareholders are entitled to a tax deduction in respect to the "attributable part" of the dividend.

The tax deduction amounts to 50% (for individual shareholders) or 33 1/3% (for superannuation fund shareholders) of the attributable part of the dividend.

The "attributable part of the dividend" is calculated by a formula but is equal to the dividend amount plus the tax paid at the company level. In practice this is equal to the grossed up value of the dividend ($100/70 \times$ dividend amount).

In this way the effect on an individual would be calculated as follows:

Dividend paid	70.00
Plus imputation credits	30.00
Less Tax deduction allowable	(50.00)
Net taxable income	50.00

Income Tax @ 48.5% (maximum rate)	24.25
Less imputation credit	(30.00)
Tax refund	5.75

Summary

Dividend Received	70.00
Tax refund	5.75
Value of dividend after tax	75.75

<i>Effective tax rate on capital gain incurred by investment company</i>	<i>24.25%</i>
--	---------------

In this way the effect on a superannuation fund would be calculated as follows:

Dividend paid	70.00
Plus imputation credits	30.00
Less Tax deduction allowable	(33.33)
Net taxable income	66.67

Income Tax @ 15% (maximum rate)	10.00
Less imputation credit	(30.00)
Tax refund	20.00

Summary

Dividend Received	70.00
Tax refund	20.00
Value of dividend after tax	90.00

<i>Effective tax rate on capital gain incurred by investment company</i>	<i>10.00%</i>
--	---------------

For corporate shareholders, the receipt of a franked dividend paid from a discount capital gains reserve will be treated in the same way as any other dividend. That is, the franking credit will be added to the company's franking account, while the dividend will be 100% rebateable and no further tax will be paid at the company level.

Corporate shareholders can not pass on the discount capital gain to their own shareholders.

(a) Gains from Disposal of Shares

Where shares in the Company are acquired on revenue account by a shareholder, any gain or loss on sale is taxable as ordinary income.

Where shares in the Company are acquired on capital account by a shareholder, any gain or loss on sale is taxed in accordance with the Capital Gains Tax rules. Where shares in the Company are held for more than 12 months, a CGT discount of 50% would be available to individual shareholders (33 1/3% for superannuation funds).

Any CGT loss incurred is quarantined and only able to be offset against capital gains derived.

(b) Gains on Disposal of Options

Any gain on sale of options will either give rise to a capital gain (if held on a capital account) or a profit if held as trading stock.

There will be no cost base of options issued under this Prospectus as they are being issued for no consideration. There would therefore be no Capital Gains Tax loss on the sale of the options issued pursuant to the Prospectus.

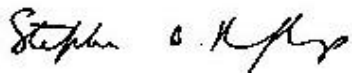

Any options acquired after the initial issue will have a cost base equivalent to the acquisition price.

On exercise of the option, a shareholder will be required to pay \$1.00 to the Company in return for the issue of one share. There are no tax consequences to the Company for the issue of the share.

The shareholder who exercises an option will acquire a share in the Company. The taxation consequences from the disposal of the share are as outlined above.

Yours faithfully,

MOORE STEPHENS WI PTY LTD CHARTERED ACCOUNTANTS

Stephen B Humphrys
Director

Management Fee

In return for the performance of its duties as Manager of the Company's Portfolio, the Manager is entitled to be paid a monthly management fee equal to 0.0833% of the value of the Portfolio calculated on the last day (comparable to a fee of 1% per annum of the average value of the Portfolio).

Performance Fee

- (a) The Manager will be entitled to be paid and the Company must pay to the Manager (which remuneration is to be obtained for the use and benefit of the Manager) a fee ("Performance Fee") in respect of each Performance Calculation Period, subject to Clauses 9.1(b) and (d), of 20% of BA where BA is calculated in accordance with the following formula:

$$BA = (FV - IV) - \left(IV \times \frac{(FI - II)}{II} \right)$$

where

BA is the base amount to be used in calculating the Performance Fee outlined above;

FV is the Value of the Portfolio calculated on the last Business Day of a Performance Calculation Period;

IV is the Value of the Portfolio calculated on the last Business Day of the preceding Performance Calculation Period;

FI is the level of the All Ordinaries Accumulation Index published by ASX on the last Business Day of that Performance Calculation Period; and

- (c) If the amount calculated is a negative number, no Performance Fee is payable in respect of that Month.
- (d) If the level of the All Ordinaries Accumulation Index as calculated on the last Business Day of a Performance Calculation Period is less than the level as calculated on the last Business Day of the preceding Performance Calculation Period, the base amount (BA) will be FV - IV.
- (e) "Performance Calculation Period" is:
 - (i) the period from the date of the Agreement to 30 June 2004;
 - (ii) the period from the first day after the preceding Performance Calculation Period to 30 June of the succeeding year; and
 - (iii) if the Term expires on a day other than 30 June or 31 December, the last Performance Calculation Period is the period from the first day after the preceding Performance Calculation Period and the date the Agreement is terminated.
- (f) Where the ASX or equivalent authority ceases to publish the All Ordinaries Accumulation Index then the published index which most closely resembles it must be used for the purposes of the calculation.
- (g) If the Agreement is terminated on a day other than the last day of a Month the Performance Fee for that Month will be determined on the last Business Day of the Term.
- (h) In calculation of the Performance fee for a Performance Calculation Period, changes in the value of the Portfolio as a result of the issue of Securities by the Company, capital reductions by the Company, share buy-backs by the Company and dividend distributions by the Company will be disregarded or adjusted for that Calculation Period in a manner determined by the Auditor of the Company at the conclusion of that Performance Calculation Period.
- (i) The Auditor has the power to determine the correct calculation of the performance fee.

The Company must indemnify the Manager against any GST payable in respect of any Management Fee or Performance Fee due to the Manager.

Expenses

The Company is liable for and must pay out of the Portfolio or reimburse the Manager the following fees, costs and expenses when properly incurred in connection with the investment and management of the Portfolio or the acquisition, disposal or maintenance of any investment:

The Company was incorporated on 10 May 2002.

10.2 Balance Date and Company Tax Status

The accounts for the Company will be made up to 30 June annually.

The Company will be taxed as a public company.

10.3 Licensed Dealers

The Company does not hold an Australian Financial Services Licence or a dealers licence. Accordingly, the Company will only issue Shares and Options pursuant to this Prospectus under an arrangement with dealers pursuant to Section 911A(2)(b) of the Corporations Act.

10.4 Share Trading and Return Risks

Before deciding to invest in Shares, each potential investor should consider whether shares are a suitable investment. There are general risks associated with any investment in the stock market. The value of the Shares can go down or up due to circumstances affecting the stock market generally or a company in particular and are due to factors beyond the control of the Company. Similarly, the level of dividends paid in respect of the Shares can go down as well as up. Shares should generally not be considered a short term investment.

If you are in doubt as to the course you should follow, you should seek advice on the matters contained in this Prospectus from a stockbroker, solicitors, accountant or other professional adviser immediately.

10.5 Rights Attaching to the Shares

Immediately after issue and allotment, the Shares will be fully paid Shares. There will be no liability on the part of shareholders for any calls and the Shares will rank *pari passu* with Shares currently on issue.

Detailed provisions relating to the rights attaching to the Shares are set out in the Company's constitution and the Corporations Act. A copy of the constitution can be inspected during office hours at the registered office of the Company.

The detailed provisions relating to the rights attaching to Shares under the constitution and the Corporations Act are summarised below:

Each Share will confer on its holder:

- (a) The right to vote at a general meeting of shareholders (whether present in person or by any representative, proxy or attorney) on a show of hands (one vote per shareholder) and on a poll (one vote per Share on which there is no money due and payable) subject to the rights and restrictions on voting which may attach to or be imposed on Shares (at present there are none);
- (b) The right to receive dividends, according to the amount paid up on the Share;
- (c) The right to receive, in kind, the whole or any part of the Company's property in a winding up, subject to the rights of a liquidator of the Company (with consent of members by special resolution).

Subject to the Corporations Act and the Listing Rules, Shares are fully transferable.

The rights attaching to Shares may be varied with the approval of shareholders in general meeting by special resolution.

10.6 Rights Attaching to the Options

The terms and conditions of the Options are as follows:

Register

The Company will maintain a register of holders of Options in accordance with Section 168(1)(b) of the Corporations Act.

Transfer/Transmission

An Option may be transferred or transmitted in any manner approved by the ASX.

Exercise

An Option may be exercised by delivery to the Company of a duly completed Notice of Exercise of Options, signed by the registered holder of the Option, together with payment to the Company of \$1.00 per Option being exercised and the relevant option certificate.

An Option may be exercised on any business day from the date of grant to 17 December 2004, (inclusive) but not thereafter.

A Notice of Exercise of Options is only effective when the Company has received the full amount of the exercise price in cash or cleared funds.

Dividend Entitlement

Options do not carry any dividend entitlement until they are exercised. Shares issued on exercise of Options rank equally with other issued Shares of the Company 7 Business Days after their date of issue and are entitled to dividends payed on and from this date.

Participating rights

An Option holder may only participate in new issues of Securities to holders of Shares in the Company if the Option has been exercised and Shares allotted in respect of the

Option before the record date for determining entitlements to the issue. The Company must give at least 7 Business Days notice to Option holders of any new issue before the record date for determining entitlements to the issue in accordance with the Listing Rules of the ASX.

If between the date of issue and the date of exercise of an Option the Company makes 1 or more rights issues (being a pro rata issue of Shares in the capital of the Company that is not a bonus issue), the exercise price of Options on issue will be reduced in respect of each rights issue according to the following formula:

$$NE = OE - \frac{E[P-(S + D)]}{(N + 1)}$$

where:

NE is the new exercise price of the Option;

OE is the old exercise price of the Option;

E is the number of underlying Shares into which one Option is exercisable;

P is the average closing sale price per Share (weighted by reference to volume) during the 5 trading days ending on the day before the ex rights date or ex entitlements date (excluding special crossings and overnight sales);

S is the subscription price for a Share under the rights issue;

D is the dividend due but not yet paid on each Share at the relevant time; and

N is the number of Shares that must be held to entitle holders to receive a new Share in the rights issue.

If there is a bonus issue to the holders of Shares in the capital of the Company, the number of Shares over which the Option is exercisable will be increased by the number of Shares which the holder of the Option would have received if the Option had been exercised before the record date for the bonus issue.

Reconstructions and Alteration of Capital

Any adjustment to the number of outstanding Options and the exercise price under a re-organisation of the Company's share capital must be made in accordance with the Listing Rules.

ASX Listing

The Company must make application for quotation of Shares issued on exercise of the Options on the ASX in accordance with the Listing Rules. Shares so issued will rank equally with other issued Shares of the Company.

10.7 ASX Waivers

The Company has obtained advice from ASX that ASX would be likely to grant the Company the following waivers in relation to the requirements of the following Listing Rules if the Shares and Options are successfully listed:

- (a) Listing Rule 1.3.1A(a) to the extent necessary to permit the Company to have at least \$10,000,000 in net tangible assets after deducting the costs of fund raising at the time of listing; and
- (b) Listing Rule 15.16 to the extent necessary to permit the Manager to act as the investment manager of the Company in accordance with the terms of the Management Agreement.

- (b) whose address, as it appears in the register of members of the Company, is situated outside Australia and who have produced to the Company such evidence as the Company may require to satisfy the Company that any necessary approvals of any government or governmental authority in relation to participation in the Plan have been obtained and that such participation is not contrary to any applicable laws of Australia or any other relevant jurisdiction.

Application

Eligible Members may elect to participate in the Plan in respect of all or part of their Shares in the Company which will comprise that member's Plan Shares. The Directors may in their absolute discretion accept or refuse any application to participate.

Subscription Price

Shares allotted to participants will be allotted at the weighted average market price of Shares sold on the ASX on the books closing date for the relevant dividend and the 3 trading days preceding that date.

Investment of Dividends

In respect of each cash dividend from time to time due and payable to a participant in respect of the member's Plan Shares, the Directors will on behalf of and in the name of the participant subscribe for Shares being the maximum number of Shares which could be acquired by subscription by the application of that participant's entitlement to dividends in respect of the Plan Shares to the subscription for Shares at the subscription price.

Ranking of Shares

All Shares allotted and issued under the Plan will rank equally in all respects with existing Shares.

ASX Listing

The Company will make application promptly after each allotment of Shares for quotation of such Shares on the official list of the ASX.

Variation or Termination of Participation

A participant may apply to increase or decrease the number of Plan Shares which the Company may in its absolute discretion approve or refuse. A participant may at any time terminate participation in the Plan by notice in writing to the Company.
