

WAM ACTIVE LIMITED (WAA) **INVESTMENT UPDATE & NTA – MARCH 2009**

WAM Active Limited (WAA) listed on the Australian Stock Exchange in January 2008 after raising \$15.4 million.

WAA offers investors exposure to an active trading style with the aim of achieving a sound return with a low correlation to traditional markets. This was achieved in our first 15 months with the Fund outperforming the All Ordinaries Accumulation Index by 34.7%.

The investment objectives of WAA are to derive an absolute return, to deliver investors an income stream in the form of fully franked dividends and to preserve capital.

In March WAA's gross portfolio (before all fees, costs and taxes) increased by 4.50%, while the All Ordinaries Accumulation Index increased by 8.05%.

NTA before tax payable and after tax assets	94.11c*
NTA after tax and before tax on unrealised	94.11c
NTA after tax	92.61c

* This includes 5.27 cents per share in tax assets.

MARKET OUTLOOK

March saw the Australian share market rise for the first month since August 2008. The All Ordinaries Index hit a low on March 6 and then rose 20 per cent in just four weeks, the strongest rally for that period in 27 years. The rally, which was broad based, came on the back of a similar upward move in US and other global equity markets. The unknown is whether the sharp rebound in share prices was due to equities simply being substantially oversold in the short term or if the bear market has officially ended. Unfortunately we cannot answer this question yet. Investors are trying to determine whether the share market has factored in the worst economic outcome, or if the recession will be more severe than expected and unemployment will reach levels not seen since the Great Depression. Once again this question will only be answered with the benefit of time. However, we do believe that we have entered a period where companies are attractively valued, a scenario we have not seen since early 2003.

PORTFOLIO STRUCTURE & STRATEGY

	As at 28 February 2009		As at 31 March 2009	
Investment Type	\$m	%	\$m	%
Listed Equities	2.29	17.1%	6.02	43.4%
