MARKET OUTLOOK

The bullish beginning to the new financial year faded in August with the S&P/ASX All Ordinaries Accumulation Index falling 0.7 per cent. The vast majority of the decline was due to a poor performance by the banking sector on the back of disappointing operating updates by the big four players. Another factor contributing to the weak month was the nations' biggest stock, BHP Billiton Limited, falling following the decision to bid for Canadian based Potash for a staggering \$40 billion. Investors were weary of the purchase price and how BHP was going to fund the acquisition.

MARKET OUTLOOK (continued)

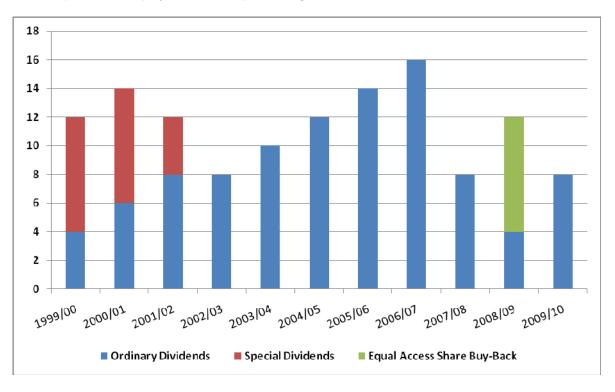

The broader market fared much better during August with the annual profit reporting season proving to be comforting for investors. Profit numbers were about in line and 2011 earnings forecasts were only revised down mildly. This benign outlook saw the S&P/ASX Small Ordinaries Accumulation Index rise a healthy 1.8 per cent for the month.

Despite this we remain cautious, believing that in the short term global macroeconomic issues will determine the direction of the overall market rather than earnings. The US economy, after a bounce following the global financial crises, has fallen on difficult times again, with the possibility of a second recession within three years becoming a possibility. Until the market can see through this period of sub optimal growth or even contraction, share markets around the globe will continue to flounder. Eventually, valuations will become compelling and valuations will be too hard to ignore. If this is the case, we will wait for this outcome with anticipation.

DIVIDENDS

On 20 July 2010 the Board announced a fully franked final dividend of 4.0 cents per share to be paid on 17 September 2010. The shares traded ex dividend on 6 September 2010. This brings the FY2010 dividend to 8.0 cents per share fully franked.

The Board is committed to paying an increasing stream of fully franked dividends to shareholders provided the company has sufficient franking credits, and it is within prudent business practices. Dividends are paid on a six-monthly basis. Recently introduced government legislation now enables companies to pay dividends if the company is deemed solvent. Dividend payments will not be reliant on reported profit and retained earnings as it was previously. Rather it will be with consideration to cash flow, cash holdings and available franking credits. Essentially, WAM Capital will always be in a position to pay dividends providing it is solvent.
