Market overview

The Australian equity market had a lacklustre performance in March with the S&P/ASX All Ordinaries Accumulation Index ('Index') rising 0.3%. After a strong start to the month, markets globally faltered following comments by new US Federal Reserve Chair Janet Yellen that the central bank would continue to slow its bond-buying program and that interest rates could go up by mid-2015. After falling 2.8% in January and then rising 4.8% in February, the Index ended the March quarter up 2.2%.

The All Ordinaries Accumulation Index is now up 17.1% for the financial year to date and up a remarkable 45.2% from its previous low in June 2012. We continue to be concerned that companies' Price to Earnings (P/E) ratios across a range of sectors are significantly exceeding their historical averages. The average P/E of the top 100 small cap companies is now above pre-GFC levels and technology firms in particular are trading on very high P/E ratios, however the current volatility of US tech stocks indicates the sector is losing its shine.

Our short term outlook for the market remains subdued as some companies appear to be overpriced with limited potential for earnings growth in the immediate term. In line with the Index's performance for the calendar year to date, we expect the market will end 2014 relatively flat. The market continues to present opportunities and, with a strong cash weighting, the investment portfolio is well positioned to capitalise on such opportunities. Over the medium to longer term, we maintain a bullish view of the equity market contingent on increased economic activity supported by historically low interest rates.

Investment Update & Net Tangible Assets Report

AS AT 31 MARCH 2014

Dividend growth

The Board is committed to paying an increasing stream of fully franked dividends to shareholders, provided the Company has sufficient profit reserves and franking credits, and it is within prudent business practices. Dividends are paid on a six-monthly basis and the dividend reinvestment plan is available to shareholders for both the interim and final dividend.

WAM Capital dividends since inception

^{*}Annualised interim dividend

On 31 March 2014, the Company paid a fully franked interim dividend of 6.5 cents per share. This was an increase of 8.3% on the previous corresponding period and represents an annualised fully franked dividend yield of 6.6%, based on the last closing price.

The Dividend Reinvestment Plan (DRP) for the FY2014 interim dividend was partially underwritten by Taylor Collison Limited. The DRP price was \$1.9432 per share.

WAM submission to FSI - levelling the playing field for retail investors

Wilson Asset Management Group is a strong advocate for all shareholders (retail and wholesale) to be treated equally and equitably when investing in the Australian equity market. On 28 March 2014, we made a submission to the federal government's Financial System Inquiry recommending that the government 'level the playing field' by allowing retail investors to participate in primary equity raisings by ASX listed entities without the use of a prospectus. Currently, wholesale investors are advantaged over retail investors with private placements to wholesale investors raising capital at an average discount of 7.8% over the last ten years.
