Market outlook

May was a torrid month for the Australian equity market with the S&P/ASX All Ordinaries Accumulation Index down 6.9%. This came after a relatively good start to 2012 and erased much of this years gain. The European sovereign debt crisis continued as a constant theme. The crisis weighed heavily on equity markets following a brief respite due to liquidity measures adopted by the ECB from December to March. Greece is now seemingly edging closer to a Euro exit and Spain to a bailout of its banking system.

However more worrying for Australian investors were signs of a slowdown in China and the mining majors making noises about the high cost and low productivity of Australian projects. This led to resources, and particularly the small resources sector, being sold off aggressively during May. Adding to the Chinese slowdown was the worsening macroeconomic data from US. This suggests the US recovery is starting to wane leaving no economic powerhouse to drive global growth.

Following a ferocious pace of earnings downgrades in April, the trend continued in May with downgrades from Myer and Toll Holdings. We are expecting further earnings downgrades from companies in the coming weeks. The Australian Bureau of Statistics reported a drop in retail sales, house prices and building approvals, which provides further evidence of the worsening economic environment.

Despite the Reserve Bank cutting interest rates by 0.5% in early May, Australian equities continued their falls. The RBA cut rates by 0.25% in June but traders are still pricing in further possible rate cuts in 2013. We believe a series of rate cuts will ultimately be a positive for industrial companies as they will stimulate the non-mining economy.

Government bond yields have tumbled globally over recent weeks with short terms bond yields even turning negative in some instances. The German 2 year notes saw yields of -0.12% at one point. Government bond yields are now hitting multi-decade lows and in some case all time historic lows across many different countries including the US, Australia, Germany and the Netherlands. UK 10 year government bond rates are at their lowest levels since 1715. Australian 10 year bond yields have fallen from 4.08% at the 31st March to 3.07% at the time of writing a fall of 25%. These steep falls in yields have been greater than the decline seen in equity markets and the current gap between the two suggests a significant dislocation to the normalised relationship between the two asset classes. Both the speed and the size of the declines recorded suggest the bond market is pricing in a significant global downturn. If this is the case, it would then infer a further drop in equity markets in the coming months in order to remove the current dislocations we are seeing.

Given the recent movements in the bond market and deteriorating global and local macroeconomic picture we have become more conservative in our outlook for equity markets in 2013. It took WAM Capital 1.83 years for the investment portfolio to return to its pre GFC level. It is now 20% above that level. While the S&P/ASX All Ordinaries Accumulation Index is still well off its pre GFC peak. Falling equity markets always provide opportunities.

Dividends – 5.5 cents per share fully franked interim

On 23 March 2012, the Company paid a fully franked interim dividend of 5.5 cents per share. This is a 10% increase on the previous year's interim dividend.

The Board is committed to paying an increasing stream of fully franked dividends to shareholders provided the Company has sufficient franking credits and it is within prudent business practices. It must also comply with Government legislation and the ATO's interpretation of a company's ability to pay franked dividends. Dividends are paid on a six-monthly basis.

Government legislation introduced in June 2010 enabled companies to pay dividends as long they are deemed solvent (and not only if they make a profit or have sufficient retained earnings). Dividend payments will be made with consideration to cash flow, cash holdings and available franking credits. This means WAM Capital will always be in a position to pay dividends providing it is solvent.

Option issue - 1 for 1 bonus issue

On 2 April 2012, the Board announced a 1 for 1 bonus issue of options to acquire ordinary shares in the capital of the Company. The options were allotted to shareholders on 3 May 2012. The options have an exercise price of \$1.60 per share and can be exercised at any time on or before 31 July 2013. The options are currently trading on the ASX under the code WAMO.

As at 7 June 2012, 25,550 options have been exercised for a total consideration of \$40,880 with a remaining balance of outstanding options being 106,794,404.

Portfolio structure

As at 31 May 2012, listed securities made up 56.6% of the portfolio with fixed interest and cash making up the remaining 43.4%. Our focus is on companies with strong earnings per share growth that trade on attractive earnings multiples, are well positioned in growth industries and have proven management. We continue to research thoroughly to identify companies that meet this profile, and have carried out over 800 company visits a year.
