<sup>\*</sup>The change in the gross portfolio before all expenses, fees and taxes.

The portfolio is currently defensively positioned with 32% in cash and fixed interest and 20% in stocks subject to takeovers which were predominantly purchased during the month. As a result of this, in September the fund was down only 0.8% while the market fell 6.3%. With the market rebound in October, the portfolio did not keep pace. Over the last 2 months the fund gained 1.8% against a 0.9% increase in the S&P/ASX All Ordinaries Accumulation index and resulting in an outperformance of +0.9%. Since 30 June 2011 the fund has increased 0.1% while the broader market has fallen 4.9%. This has been achieved with significantly less risk and volatility than the market.

The following NTA figures are after the payment of a fully franked final dividend of 5.0 cents per share paid on the 15 September 2011.

### **Market Outlook**

October saw the bulls return in force with the S&P/ASX All Ordinaries Index Accumulation Index up 7.2%. Europe remained the focus for investors with speculation of a bailout package driving the market higher during the month. News of European bank recapitalisations and the European Financial Stability Facility (EFSF) instilled confidence with investors that an end was in sight to the debt situation.

Locally, economic data remains weak, reflecting recessionary type conditions in some sectors. Early November has seen the Reserve Bank produce the first interest rate cut for over two and a half years. The driver behind their decision, apart from weak economic data, was that the outlook for inflation has improved significantly since the start of 2011. We see this initial cut as a positive for equity markets, however we believe a succession of rate cuts will be needed to stimulate the domestic economy. As always we continue to research heavily for individual stock opportunities.

#### **Dividends**

On 15 September 2011, the company paid a fully franked final dividend of 5.0 cents per share. This brought the FY2011 dividend to 10.0 cents per share fully franked.

The Board is committed to paying an increasing stream of fully franked dividends to shareholders provided the company has sufficient franking credits, and it is within prudent business practices. Dividends are paid on a six-monthly basis. Dividend payments will be made with consideration to cash flow, cash holdings and available franking credits.

Providing the company is deemed solvent by the Board, WAM should always be in a position to pay dividends.

#### **Portfolio Structure**

As at 31 October 2011, listed securities made up 68.0% of the portfolio, while fixed interest and cash made up the remaining 32.0%. We continue to focus on companies with strong earnings per share growth, trading on attractive earnings multiples, are well positioned in growth industries and have proven management. We continue to research heavily in an attempt to identify companies that meet this profile, with over 700 company visits a year.
